2. **(Currently Amended)** The method for situation tracking according Claim 1  
further comprising determining an alert type associated with the alert at the clearing house and  
wherein the public safety event comprises a type indication, a location indication, a time  
indication, a date indication, an access level indication and event details, the access level  
indication indicating a plurality of subscribers whose requests to access information  
concerning the matched public safety event are to be granted.

3. **(Original)** The method for situation tracking according to Claim 1, wherein the  
subscriber profile comprises a notify criteria, the notify criteria comprising a geographic  
distance around a first location indication, wherein the event comprises a second location  
indication and wherein generating a notification comprises determining whether the second  
location indication is within the geographic distance of the first location indication.

4. **(Currently Amended)** The method for situation tracking according to Claim 1 further comprising:

associating at least one information need with the subscriber profile, the information need comprising at least one event related item of interest to the subscriber;  
comparing the information need to at least one of the public safety events; and  
determining at least one notification to be generated in response to a result associated with the comparison.

5. **(Original)** The method for situation tracking according to Claim 4, wherein the result comprises a selected event selected based on the comparison.

6. **(Original)** The method for situation tracking according to Claim 5, wherein generating the at least one notification comprises generating at least a portion of one web page based on the selected event and wherein the destination comprises a web site.

7. **(Original)** The method for situation tracking according to Claim 5, wherein generating the at least one notification comprises generating at least one electronic mail message based on the selected event and wherein the destination comprises an electronic mail address.

8. **(Original)** The method for situation tracking according to Claim 5, wherein comparing the information need comprises determining whether the subscriber is allowed to access the event.

9. **(Original)** The method for situation tracking according to Claim 1, wherein handling the event comprising:

updating the event when the alert is updating an existing event; and  
generating the event when the alert is associated with a new event.

10. **(Original)** The method for situation tracking according to Claim 1, wherein the subscriber profile comprises a generic profile.

11. **(Original)** The method for situation tracking according to Claim 10, wherein the generic profile comprises a media generic profile.

12. **(Currently Amended)** The method for situation tracking according to Claim 11, wherein generating the notification comprises:

comparing at least one criteria element associated with a notify criteria associated with the subscriber profile and at least one event element of the **emergency public safety** event;

determining a match between the notify criteria and the **emergency public safety** event based on the comparison; and

determining whether a media subscriber associated with the media generic profile has access to the matched **public safety** events.

14. **(Canceled)**

15. **(Canceled)**

17. **(Currently Amended)** A method for crime tracking comprising:  
generating an alert from a mobile device associated with a law enforcement vehicle;  
communicating the alert to a server;  
handling a crime event associated with the alert at the server;  
generating a notification in response to a subscriber profile and the **crime** event;  
comparing at least one criteria element associated with a notify criteria associated with the subscriber profile and at least one event element of the crime event;

determining a match between the notify criteria and the crime event based on the comparison; and

determining whether a subscriber associated with the subscriber profile has access to the matched events based on a type associated with the **subscriber** profile, **the type indicating whether a particular portion of information concerning the matched event is be transmitted to the subscriber in response to receiving a request to access the information from the subscriber.**

18. **(Original)** The method for crime tracking according to Claim 17, wherein the alert comprises a type indication, a location indication, a time indication, a date indication and a payload.

19. **(Currently Amended)** The method for crime tracking according to Claim 17, wherein the criteria element and the crime event element comprise a geographic location associated with the crime event.
